

PROFESSIONAL SUMMARY

Front-End Web Developer skilled in crafting responsive, high-performance web applications and interactive web-based tools. Experienced in building event-driven web applications using modern JavaScript (ES6+), HTML5, and CSS3, coupled with Firebase for real-time state synchronization, secure authentication, and cloud data architecture. Proficient in version control, edge deployments via Cloudflare, and developing gamified Telegram Mini-Apps (TMA) and Progressive Web Apps.

FEATURED PROJECTS

BANKRUPTt — Web3 Mining Mini App & PWA Live • 2026

Tech Stack: JavaScript (ES6+), Firebase (Auth & Firestore), Cloudflare, GitHub

- Architected and launched a fully interactive, mobile-first Web3 Telegram Mini-App style mining application deployed at [bankruptt.xyz](#).
- Engineered real-time streak multipliers (1.0x to 1.6x), countdown claim timers, and automated reward calculation logic.
- Integrated Firebase Authentication for persistent user sessions with unique UID assignment and cloud state synchronization.
- Developed a multi-tier viral referral engine with custom link generation, quota tracking, and commission calculations.
- Implemented dynamic task completion verification for external social channels (Telegram, X) and interactive UI modals.
- Configured high-performance edge routing, SSL security, and custom DNS caching via Cloudflare.

Responsive Web Applications & UI Modules 2024 – Present

Tech Stack: Modern JavaScript, Semantic HTML5, CSS3 Grid/Flexbox, Git

- Built lightweight, cross-browser compatible landing pages and UI dashboards with micro-interactions and dark mode themes.
- Applied performance optimization techniques, achieving sub-second load times and high mobile responsiveness.
- Managed automated code pushes and continuous deployment pipelines using GitHub and Cloudflare Pages.

KEY COMPETENCIES

- **Frontend Engineering:** Single Page Applications (SPA), Progressive Web Apps (PWA), DOM manipulation, asynchronous state management.
- **Backend as a Service:** Realtime database schema design, Firestore security rules, serverless user authentication.
- **Gamification & Growth:** Daily streak mechanics, referral attribution trees, real-time leaderboard counters.

TECHNICAL SKILLS

Languages & Markup

- JavaScript (ES6+)
- HTML5
- CSS3

Cloud & Backend

- Firebase Auth
- Cloud Firestore
- Realtime Database

DevOps & Hosting

- Cloudflare DNS
- GitHub / Git
- Cloudflare Pages

Architecture & Niche

- Mobile-First UI
- Telegram Mini-Apps
- Web3 / GameFi UI
- Referral Systems
- REST API Integration

EDUCATION

Bachelor's Degree

Asutosh College

Graduated 2018

TOOLS & WORKFLOW

- VS Code & Terminal
- Chrome DevTools & Debugging
- Git Branching & GitHub CI/CD
- Cloudflare SSL & Edge Routing

KEY STRENGTHS

- Rapid MVP Prototyping
- Clean, Modular Code
- Responsive Mobile Design
- Independent Problem Solver
